

100% CUSTOM ORTHOTIC

MEDICAL GREEN

soft

- ✓ Resilient and durable top layer with antibacterial coating
- ✓ Soft memory foam cushioning for extra comfort
- ✓ Re-engineered balance plate with foot stabilising and pressure dispersing lighter heel cup for even weight distribution
- ✓ High-strength base surface

FootBalance Medical Green soft features a redesigned balance plate that stabilises feet and distributes weight more evenly to reduce the concentration of pressure, particularly on the heel. The resilient fabric top layer helps prevent friction, feels comfortable underfoot, while memory foam cushioning provides increased shock absorption and comfort for every step.

Medical Green soft has been developed especially for sensitive feet that require extra comfort to help ease foot-related symptoms of illnesses such as rheumatism and osteoporosis and patients suffering with plantar heel pain.

The orthotic is also suitable for diabetic patients for pre-ulcerative conditions, as a preventative care to reduce the condition progressing further. The extra soft orthotic provides light arch support and fits a wide range of footwear.

Width: Standard

Topcoat: Durable, high-strength hexagon weave fabric + antibacterial coating

Cushioning: 1 2 ③

Support: ① 2 3

Sizes: 34-52

Weight (size 42): 52g

Developed in cooperation with the Podiatry Department of Metropolia University of Applied Sciences (Helsinki, Finland) and field tested by Testing Lab (Finland).
