

# 100% CUSTOM ORTHOTIC MEDICAL KIDS

Write your name here

Robot print designed by Otto, 8 years

- ✓ Extremely durable and breathable polyester topcoat with Silver Ion antibacterial treatment
- ✓ Comfortable feel with high-quality shock absorption
- ✓ Patented custom moulded balance plate for dynamic arch support
- ✓ High-strength bottom surface

Medical Kids 100% Custom Orthotic is specially designed for children's foot conditions, offering gentle light support and medium cushioning for the small feet. It features the FootBalance patented dynamic balance plate, which supports feet towards more natural alignment during everyday activities and sports participation. This all-around model has a standard width and it fits to a wide range of footwear.

Note that Medical Kids 100% Custom Orthotic requires a softer kid's moulding pillow (FPI008) that is specially designed for lighter customers.

Health care professional is responsible for providing and moulding this product.

## Positive feedback from the testing group

- Study of 22 patients for children in ages 4-10 years for a minimum of one month use.
- Many of the patients had misalignment or discomfort in their feet.
- All patients confirmed that the insoles offered help or at least some help to the original foot problem.
- 91% of patients didn't feel discomfort during the use of insoles but patients felt comfortable, light and good with the insoles.
- Some patients even said the foot pain stopped and they were able run faster!
- 95% said the cushioning was soft enough and the support was enough.
- 100% of the patients will continue using the insoles.
